

# Delta Road

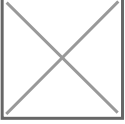

**Description:** The classic Delta handcycle style with two wheels in the back and one in the front. The road version is usually lower to the ground and you lay almost flat. Handcycles are optimized for low weight.

	<b>Pros</b>		<b>Cons</b>
---	-------------	---	-------------

Low center of gravity makes it more stable on turns Low wind resistance means you can pedal faster Generally lighter weight

Hard to be seen on the road as you are so low Almost no clearance Traction issues with front wheel spinning going up hills on gravel

## Handcycle models

Handcycle	Price	Image
<a href="#">Top End Force R</a>	\$9,999	
<a href="#">Top End Force RX</a>	\$9,999	
<a href="#">Top End Force G</a>	\$7,999	
<a href="#">Maddiline Carbide3</a>	\$25,900	
<a href="#">Maddiline Pro Evo</a>	\$10,900
