Reactive Adaptations Wildcat T1

reactive adaptations Mako.jpg
The Reactive Adaptations Wildcat T1 is a custom-built off-road handcycle designed for kids and young riders, engineered in Crested Butte, Colorado. Its tadpole frame design and adjustable crankset (6" vertical range) grow with the child, while foot slings adjust ~10" fore/aft for a versatile fit. Drivetrain: Shimano Alfine 8-speed internal hub with a 22-tooth crankset and 32-tooth gear. Brakes: TRP E745 and E740 hydraulic disc front (180mm rotors) and hydraulic rear (160mm rotor). 12" wide seat with 1" foam cushion and washable cover. Lightweight, durable construction for confident trail riding.
