

Top End Force 3 Dual Motor

The dual motor Force 3 is a custom modified Top End Force 3 (older model) that has two direct drive motors in the rear. This provides excellent traction when going up hills as well as regen braking that can electronically limit downhill speed.

Details:

Product Page	No longer in production (buy used)
Price	\$7,000
Has e-assist	✓
Quad/Tetra	
Off-road	✓
Suspension	
Style	Delta Gravel

Pros and Cons of tadpole style

Pros	Cons
<ul style="list-style-type: none">• Rear wheel drive is better traction than front wheel• Regen braking allows for limiting downhill speed electronically• All wheel drive• Comfortable seating position• Relatively low price	<ul style="list-style-type: none">• Large turning radius• Low clearance• Need to custom fab parts to build
